

## Recycling Maths 2

What has been recycled forever on our planet, and recycles itself (without any help from us)? WATER! Welsh Water recycles water. We take water from the river (clean it, use it, clean it again) and put it back into the river or sea. We can ALL help the planet by recycling other materials.

Read through these Recycling facts. Use the information to fill in the table.

	Percentage	Fraction	Decimal
Up to 80% of a vehicle can be recycled.	80%	8/10	0.8 or 0.80 These numbers are the same
29 out of 100 recycled bottles go into making new bottles.			
16p of each pound you spend on a product pays for the packaging.			
9 out of 10 people would recycle more if it were made easier.			
6 out of 10 items in the bin could have been recycled.			
Half of all waste in the average dustbin could be composted.			
One out of four electrical items taken to the tip could be re-used.			
18 out of 20 disposable nappies end up in landfill.			
In America 14 out of 20 cans are recycled.			
30 out of 50 people living in Germany recycle.
