

# Being wise with water

There is no new water in the world, we are using the same water that the dinosaurs used. Use as much water as you need but please don't waste it!

Here are some top tips to save water...

Always fill your washing machine. A full load of washing uses less water than two half loads.

Use a watering can rather than a hosepipe. Collect and use rainwater from a water butt.

Leaving the tap running when brushing your teeth could waste 18 litres of water.

Always fill the kettle with just the amount you need.

Using a hippo bag in your toilet cistern will save 3 litres of water every time you flush.

Use a shower rather than a bath. A bath can use 80 litres of water and a 5 minute shower uses only 35 litres.

Wash your vegetables in a bowl rather than under a running tap.
