### Interim management report

The directors have pleasure in presenting their management report, together with the financial statements for the six months to 30 September 2019 on pages 4 to 15.

#### **Principal activities**

The principal activities of the company are the supply of water and the treatment and disposal of waste water under the Instrument of Appointment made by the Secretary of State for Wales under the Water Act 1989.

#### Results and dividends

The loss before taxation for the six month period to 30 September 2019 amounted to £80.6 million (September 2018: loss of £21.5 million). No dividend was declared or paid during the period (2018: £nil).

#### **Business review**

Dŵr Cymru's underlying loss (loss before tax excluding fair value gains on derivative financial instruments) for the six month period to 30 September 2019 was £28.2 million (September 2018: £29.2 million). Higher revenue (£5 million) relating mainly to consumption increases and lower operating costs (£7 million) due to less severe weather are more than offset by a higher depreciation charge (£11 million), a consequence of schemes being completed as the five-year AMP period reaches its close. "Customer reserves" (the company's regulatory capital value less net debt) now stand at over £2.4 billion.

The strong operational performance and financial position bring significant benefits to the three million people Dŵr Cymru serves across most of Wales, Herefordshire and Deeside while also safeguarding the environment as it continues with its five year £1.7 billion investment programme. The performance reflects the efficient way the company is managing costs while continuing to improve services to customers.

#### Principal risks and uncertainties

From the perspective of the company, the principal risks and uncertainties are integrated with the principal risks of the group and are not managed separately. Accordingly, the principal risks and uncertainties of the Glas Cymru group, which include those of the company, are disclosed within the group's annual report. Management does not consider that these have changed materially during the first six months of the year, nor that there will be any significant change between now and the end of the year. Page 15 of this report refers to risk management of treasury activities within the company.

#### **Key Performance Indicators**

The company is part of a group controlled by Glas Cymru Holdings Cyfyngedig. The directors of Dŵr Cymru Cyfyngedig use group-wide key performance measures as indicators to the development, performance and position of the company. These are discussed in the Annual Report of Glas Cymru Holdings Cyfyngedig which does not form part of this report (available on the group's website at http://www.dwrcymru.com/en/Reading\_Room\_Library/Company-Reports.aspx).

The notes on pages 9 to 15 form part of these condensed interim financial statements  $\,$ 

#### 1. Basis of preparation

Dŵr Cymru Cyfyngedig (the Company) is a company domiciled in England and Wales. The Company's principal activity is the operation of water and sewerage business in the UK.

These interim financial statements have been prepared in accordance with IAS 34 Interim Financial Reporting and should be read in conjunction with the Company's last annual consolidated financial statements for the year ended 31 March 2019. They do not include all of the information required for a complete set of IFRS financial statements, however selected explanatory notes are included to explain items that are significant to an understanding of the changes in the Company's financial position and performance since the last annual financial statements.

The principal accounting policies adopted in the preparation of these interim financial statements are consistent with the Annual Report and Accounts for the year ended 31 March 2019, with the exception of the following standards which are effective for accounting periods beginning on or after 1 January 2019; these standards have been applied in the interim financial statements and will be reflected in the Company's annual financial statements for the year ending 31 March 2020:

#### **IFRS 16 Leases**

IFRS16 revises the treatment of leases in financial statements and largely eliminates the accounting distinction between operating and finance leases. The Directors have assessed the impact of adopting IFRS 16 and have used the modified retrospective approach on first time adoption, and therefore the comparative information has not been restated and continues to be reported under IAS 17 and IFRIC 4. This has resulted in the recognition of a £1.4m right-of-use asset and associated finance lease liability. The Company presents right-of-use assets that do not meet the definition of investment property in property, plant and equipment and lease liabilities in borrowings in the balance sheet. The Company, applying the practical expedients on a lease-by-lease basis to its portfolio of leases, has elected not to recognise the right-of-use assets and lease liabilities for leases of low-value assets and short-term leases, including IT equipment. The Company has also elected to apply a single discount rate to the portfolio of leases that are deemed to have reasonably similar characteristics as well as exclude any initial direct costs in the measurement of the right-of-use asset.

#### IFRS 16 'Leases' Accounting policy

The Company recognises a right-of-use asset and a lease liability at the lease commencement date. The right-of-use asset is initially measured at cost, and subsequently at cost less any accumulated depreciation and impairment losses, and adjusted for certain remeasurements of the lease liability. The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the Company's incremental borrowing rate. Generally, the Company uses its incremental borrowing rate as the discount rate. The lease liability is subsequently increased by the interest cost on the lease liability and decreased by lease payments made. It is remeasured when there is a change in future lease payment arising from a change in an index or rate, or as appropriate, changes in the assessment of whether a purchase or extension option is reasonably certain to be exercised or a termination option is reasonably certain not to be exercised.

The Annual Report and Accounts are published on the Company's website www.dwrcymru.com and are available from the Company Secretary on request.

These condensed interim financial statements are unaudited. The interim financial results do not comprise the Company's statutory accounts within the meaning of Section 434 of the Companies Act 2006. The comparative figures for the financial year ended 31 March 2019 are not the Company's statutory accounts for that financial year. Those accounts have been reported on by the Company's auditor and delivered to the registrar of companies. The report of the auditor was (i) unqualified, (ii) did not include a reference to any matters to which the auditor drew attention by way of emphasis without qualifying their report, and (iii) did not contain a statement under section 498 (2) or (3) of the Companies Act 2006. No events or transactions took place during the current interim period which are material to an understanding of these financial statements.

The Company is limited by guarantee and does not have any share capital. In the event of the Company being wound up, the liability of its members is limited to £1 each.

#### 1. Basis of preparation (continued)

#### **Estimates and Judgements**

The preparation of condensed interim financial statements requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets and liabilities, income and expenditure. Actual results may differ from these estimates.

In preparing these condensed interim financial statements, the significant judgements made by management in applying the Company's accounting policies and the key sources of estimation uncertainty that affect the reported amount of assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reported period were the same as those that applied to the financial statements for the year ended 31 March 2019. The significant judgements and estimates relate to the provision for impairment of trade receivables, pension benefits, fair value estimation and capitalisation with the exception of changes in estimates that are required in determining the provision for income taxes. Taxes on income in the interim period are accrued using the tax rate that would be applicable to expected total annual earnings. The Company has reviewed assets held for any indications of impairment and, none having been noted, has not performed a full impairment review.

#### Going concern

The Company meets its day-to-day working capital requirement through its bank facilities. The Company's forecasts and projections, taking account of reasonably possible changes in trading performance, show that it should be able to operate within its current facilities. After making enquires, the Directors have a reasonable expectation that the Company has adequate resources to continue operational existence for the foreseeable future. The Company therefore continues to adopt the going concern basis in preparing its financial statements.

#### 2. Segmental information

The Directors consider that there is only one operating segment, being the operation of water and sewerage business in the UK. As the Company has only domestic activities there is also only one geographical segment; therefore, the disclosures for this segment have also already been given in these financial statements. While the Company operates in a single segment, its activities can be disaggregated into the following principal income streams:

Regulated revenue relates to the provision of water, sewerage and related retail services operating under Dŵr Cymru Cyfyngedig's licence as part of the water industry in England and Wales, regulated by The Office of Water Trading (Ofwat). Other (non-regulated) revenue relates to income streams which are not subject to Ofwat's price control.

Derivative financial instruments are held for economic hedging purposes although they do not qualify as accounting hedges under IFRS 9. Consequently, the Company's interest rate and currency swaps are fair valued at each balance sheet date with the movement (net loss or gain) disclosed in the income statement. If held to maturity, which is the Company's intention, the value of these will be zero.

Adjustments in respect of prior years	-	-	0.1
_	12.5	2.9	17.8

The Company does not expect to pay corporation tax for the current year due to the availability of capital allowances on its investment programme.

Adjustments in respect of prior years' relate to revisions to tax credits for energy efficient capital expenditure, and adjustments to deferred tax balances in respect of capital expenditure.

Deferred tax has been calculated at 17% for each of the above periods. This is based on the corporation tax rate which will apply from 1 April 2020. A small proportion of the temporary difference may reverse prior to 2020 at 19%, however the impact on the overall deferred tax balance is not significant.

#### 10. Financial risk management and financial instruments

The Company's activities expose it to a variety of financial risks: market risk (including fair value interest rate risk, cash flow interest rate risk and price risk), credit risk and liquidity risk.

The condensed interim financial statements do not include all financial risk management information and disclosures required in the annual financial statements; they should be read in conjunction with the Company's annual financial statements as at 31 March 2019. There have been no changes in the risk management department or in any risk management policies since the year end.

In accordance with IFRS 13 Fair Value Measurement trading and treasury derivatives of the Company are categorised into different levels:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2: inputs other than quoted prices included within Level 1 that are observable for the assets or liability, either directly (that is, as prices) or indirectly (that is, derived from prices); and
- Level 3: inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs).

All of the Company's treasury derivatives are categorised as Level 2. Trading derivatives, relating to power price hedges, are categorised as Level 2 where marked-to-market valuations are received for these trades. Where marked-to-market valuations are not received the fair values are estimated rather than observable, and are therefore categorised as Level 3. At 30 September 2019 the fair values of derivatives were as follows:

#### Level 2:

- Assets: trading derivatives £2.6m, Treasury derivatives £nil. (March 2019: Trading derivatives £2.5m, Treasury derivatives £nil).
- **Liabilities**: trading derivatives £0.1m, Treasury derivatives £344.1m (March 2019: Trading derivatives 0.2m, Treasury derivatives £287.9m).

#### Level 3:

- **Assets**: trading derivatives £5.6m, Treasury derivatives £nil. (March 2019: Trading derivatives £2.4m, Treasury derivatives £nil).
- **Liabilities**: trading derivatives £0.1m, Treasury derivatives £nil (March 2019: Trading derivatives £0.6m, Treasury derivatives £nil).

Trading derivatives relate to power hedges. Treasury derivatives relate to interest rate swap contracts. All derivatives are recorded on the balance sheet at fair value.

Level 2 debt investments are valued using a discounted cash flow approach, which discounts the contractual cash flows using discount rates derived from observable market prices of other quoted debt instruments of the counterparties.

Level 3 debt instruments are valued using a discounted cash flow approach, which discounts the contractual cash flows using discount rates derived from observable market prices of other quoted debt instruments of the counterparties. Level 3 debt instruments are valued by comparing valuations from Level 2 trades for the same periods, with the valuations from observable trades being inflated or deflated to allow for any fixed price variations.
