

Our Ref:

Dear Customer

We have completed work on or near your clean water supply pipe, and during this work we have identified that the pipework going into your property may be made of lead and this pipe isn't owned by Welsh Water.

If you'd like to have your water tested for lead or have any queries please get in touch on **0800 052 0130**.

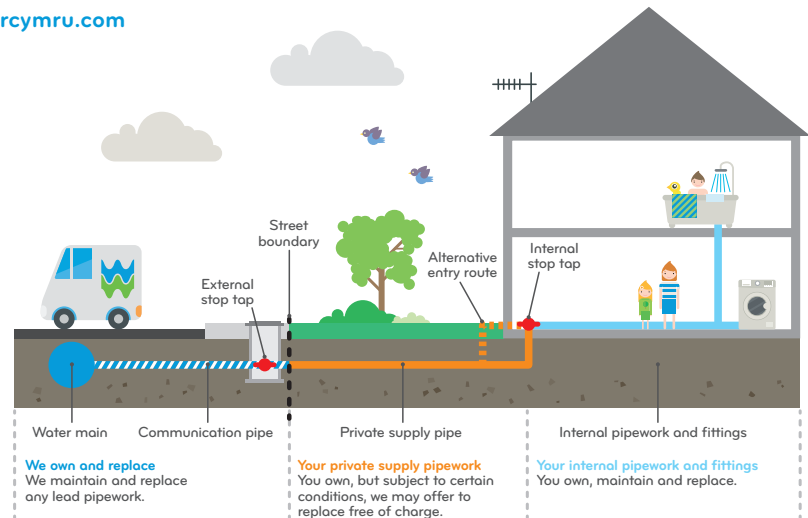

You can also find more information on our website – www.dwrcymru.com

Lead can be harmful if too much builds up in the body but a few easy steps will reduce any lead that may possibly be in your water:

We recommend:

- The first time you use water following receipt of this leaflet you run the cold water at your kitchen tap for a minimum of 10 minutes
- Then for the next 3 days, before you first use the kitchen tap run for 2 minutes

In addition if the water has been standing overnight, or for a few hours during the day, run the kitchen cold tap for a couple of minutes before using it for cooking and drinking – even before filling a kettle to boil or brushing your teeth.

We hope that you are happy with the improvements we have made to your water supply pipework. If you have questions about this work please contact us on our free phone number: **0800 052 0130**
